

7th Caribbean Winter School 2016

msa | münster school of architecture in cooperation with ETSAB, Escola Tècnica Superior d'Arquitectura de Barcelona UPC and Technical University CUJAE, La Habana

Münster University of Applied Sciences

msa | münster school of architecture

Information

Workshop dates: 14. February - 06. March 2016

Objectives

In Havana an economic and sociological change is expected. In consequence, the population will increase in the metropolis. This means not only a renewal of the old town but also a higher density of suburbs to avoid urban sprawl.

The unfinished suburbs need to be completed and condensed. Unused relics must be activated by an attractive use.

The aim of the Winter School is to discuss new design strategies for district completions. The practicality of the strategies thus developed shall be tasted by a design project in the quarter "Havana del Este," a district which was built after the Revolution in the philosophy of the "Charter of Athens."

Certificate

A msa Winter School certificate will be awarded upon completion of the program. The 3-week course combined with a preparation phase is allocated with 10 Credits in accordance with the European Credit Transfer System ECTS.

Target Groups

The course is focused on students in architecture graduated with bachelor degree from a school of architecture.
